

## QUALITY POLICY & OBJECTIVES

Unitex UK Ltd specialise in the design, manufacture and supply of industrial products, comprising of webbing and hardware supplying mainly into automotive, aviation, height safety, fall arrest, lifting and load restraint markets.

The nature of the company's activities places particular emphasis on safety, quality and reliability, and the understanding of the requirements of our customers.

The objective of the management of Unitex UK Ltd is to provide products in a manner which conforms to the specified requirements of customers and statutory/regulatory requirements. It is therefore company policy to establish and maintain an effective and efficient management system, whereby such requirements are identified, met and maintained.

Unitex UK Ltd will ensure that all employees are fully conversant with company objectives, through an ongoing training and education programme. We are totally committed to ensure the compliance, effectiveness and continual improvement of our quality management system, and shall provide a framework for establishing and reviewing the organisations objectives.

The quality management system of Unitex UK Ltd is based upon, but not limited to, the requirements of BS EN ISO 9001.
